They were erected on the orders of Pharaoh Ramesses II in the 12th century BC to display the power of Egypt to the visitors from Nubia.

Due to the construction of the Aswan High Dam and the creation of Lake Nasser, the temples of Abu Simbel were at risk of flooding. To protect them from destruction, in 1964–1968 the temples were moved above the water surface to a place about 65 m higher than their previous location.
